

OBJECTIVE

To advance my career with a leading organization that will utilize my extensive software development knowledge while also allowing me to develop further as a professional

I am a tenacious Full Stack Engineer that is passionate in learning more and becoming a better developer. I am proficient in bringing mockups and ideas to life it really brings me joy and troubleshooting simple/complex issues using my problem-solving capabilities.

TECHNICAL PROFICIENCIES

- | | | |
|------------|------------|---------------|
| • HTML | • React | • JavaScript |
| • CSS/SCSS | • MongoDB | • jQuery |
| • Node | • Mongoose | • Bootstrap |
| • Express | • Redux | • Wireframing |

PROJECTS

- [Sorting Visualizer](#) – This is sorting visualizer where you can see how different sorting algorithms work. My favorites are merge sort, quick sort and radix sort.
- [Music App](#) - In Musicat you can listen to any song, album and artist. You can even create your own playlist and keep track of liked songs. I am using Spotify api which requires me to have a backend. You can view demo in my portfolio project section
- [Movie App](#) - Popcon is a movie streaming website you can search any movie and add it to your watchlist. I love using redux state management is so easy.
- [Pura Vida](#) - Pura Vida is a painting service company that does residential and commercial jobs. I created this website based on a wireframe.

CERTIFICATIONS AND LICENSURE

- HTML5 Application Fundamentals (Microsoft)

VOLUNTEERISM

- Participated in a service produced by a religious organization to help better the community by educating the public on overcoming personal and family challenges, analyzed and identified people's needs to provide personalized support.
